Skills

Languages: Dart, Go, Svelte, Python, SQL, TypeScript

Technologies & Tools: Flutter, SvelteKit, Git, Figma, Azure, Docker, Kubernetes, Kafka, Redis

Work Experience

Nuclei, Bangalore

July 2024 - Present

Software Development Engineer 2

- Led a team of 5 engineers, mentoring junior team members and managing sprint planning, resource allocation, and team processes.
- Managed external integrations with Saleor, Strapi, Keycloak, and CRM.
- Optimized partner onboarding processes, reducing partner asset onboarding time from 6 hours to 30 minutes.
- Led platform-wide improvements to increase payment flow reliability, reducing transaction failures by 80% through improved flows, proactive monitoring and error management.
- Worked on integrating conversational AI interfaces, enhancing user engagement and operational efficiency for SaaS Marketplace.
- Designed and implemented an automated invoice processing pipeline, achieving 95% accuracy, reducing processing time from 1 week to 2 minutes, and decreasing internal team's manual effort by 80%.

Nuclei, Bangalore

Jul 2022 - Jun 2024

Software Development Engineer

- Building SaaS Marketplace - Played a key role in the development, launch and growth of the new product that manages E2E software subscriptions. (Live with 10+ leading institutions across the world - Mastercard, HDFC, ICICI, HSBC, DBS, etc.)
- Developed comprehensive user authentication flows and integrated payment gateways including Stripe, and MPGS.
- Enhanced application performance significantly by upgrading Flutter, optimizing code, and enabling CDN, improving load times by 60%.
- Implemented CI/CD workflows reducing deployment time from 10 minutes to 2 minutes.
- Solved critical state management and dependency injection issues, reducing new page load time by 2-3 seconds.

Nuclei, Bangalore

Jan 2022 - Jun 2022

Full Stack Developer Intern

- Worked as Frontend Engineer (Flutter) for Merchant Marketplace project
- Led the migration of Hotels & Flights category to Flutter Web with Null Safety, allowing over the air updates without new SDK releases
- Helped in solving a critical memory leak issue, reducing memory spikes from 2GB to 500MB, enhancing app stability on older android devices

Education

Vellore Institute of Technology, Vellore

B.Tech in Computer Science and Engineering

Aug 2018 - Jun 2022

CGPA: 8.72/10

Project Work

- **TumorInsight:** A Brain Tumor Detection and Classification model which classifies input Brain MRI image into 3 types of Tumor and shows detected tumor location. The trained RESNET50 classification model showed 94% accuracy.
- **QuickDrop-A File Sharing Hub:** A group file sharing platform built using Django framework and RDBMS. Easy to deploy web application with no restrictions and enhanced usability features.

Achievements

- **Winner** – Nuclei Ideathon 2022
- **Journal** – Covid-19 and Pneumonia Chest Infection Detection and Classification, TURCOMAT 2021
- **Journal** – Spam, A Digital Pollution and Ways to Eradicate It, IJEAT 2019
